

MK400 MAGNETIC HOIST - A PERFECT SOLUTION FOR OPENING OF MANHOLE COVERS

MK400 is an universal magnetic hoist for opening all kinds of cast iron covers and grates. With weight less than 5 kg and a magnet with a 400 kg nominal lifting force it is a handy but super powerful must have gadget for any infrastructure worker. A large magnet with 240 cm² surface delivers exceptional magnetic power even on covers with very structured or dirty surface. This means that in most cases the tool is limited not by the strength of the magnet but only by the user's own strength or by the safety at work regulations respectively. With MK400 the cast iron covers can be lifted, tilted or dragged.

The self-standing mode reduces the need to bend down for picking up the tool. All metal parts are made of stainless steel to ensure long lifespan and easy maintenance. The MK400 comes with a wooden protection cap to avoid unwanted magnet contacts while not in use.

Rubber handles

Reflective element for safer use in traffic

All metal parts made of stainless steel

Rubber grip for easy carrying

Wooden protection cap

Knuckle joint with self-standing mode

400kg magnet with 240 cm² surface

PROPERTIES

Magnet strength: 400 kg

Magnetised area surface: 240 cm²

All metal parts made of stainless steel

Permanent magnet

Tool height: 75 cm

Tool weight: 4,7 kg

Rubber handles, safety reflective element

Wooden protection cap for magnet
